TALCOTT & TEVIS, PUBLISHERS.

VALPARAISO, INDIANA.
METTE PUBLISHING HOUSE, PRINTERS.
1885

Allen County Public Library
Ft. Wayne, Indiana

VALPARAISO 30 YEARS AGO.

View of Main Street, from East Side of Franklin, Showing the Tower of the Old Court House, as Originally Constructed; Also, the Wooden Buildings of That Date Along the North Side of Our Principal Thoroughfare.

VALPARAISO.

It can not be else than a matter of pleasure to the citizens of Valparaiso to see, as evidenced by this book, the growth of their city. While other cities have grown more rapidly none of a like kind have grown more steadily or upon a more reliable basis. There is nothing of a mushroom growth about Valparaiso. The building of the water-works system, the construction of a new railroad in late years, and the general growth of the residence and business parts of the city should be and is reason for pride and self gratulation by every resident. The unbounded success of the Normal school, the revival of manufacturing interests, and the advance in the extent and scope of trade are unquestioned evidences of a prosperous future. As a city of business enterprise and educational facilities Valparaiso has no superior outside the few large cities of the state. Therefore this work is not presented with an apology, it is presented with a justifiable pride.

EDUCATIONAL.

County Superintendent, Homer W. Porter.

VALPARAISO PUBLIC SCHOOLS.

CALENDAR.—First term opens Sept. 7 and closes Dec. 24, 1885; second term opens Jan. 4 and closes May 29, 1886.

Monday in December.

VALPARAISO CITY DIRECTORY.

The publishers of the VALPARAISO CITY DIRECTORY take pride in presenting this volume to its patrons and the citizens generally. Starting out with no similar work of the city as a basis, every step of the work has been more or less arduous and fraught with more or less uncertainty. Its success is due greatly to the prompt and liberal responses of the business men of the city. Upon the usual estimate for basing such statistics there are about 6,000 actual inhabitants in the city limits. Coupling this with the 2,000 students, and more, who regularly attend the Normal School, Valparaiso has a population of 8,000 people which ranks it as one of the leading cities of the state. There can be no doubt of the usefulness of this work. As a book of ready and constant reference its usefulness will be proven every day.

CLASSIFIED BUSINESS DIRECTORY.

ATTORNEYS AT LAW.

Wm Johnston, s Washington, up stairs ; W. E. Pinney, e Mechanic; Jas. Howard, Washington and Mechanic, up stairs; John E. Cass, Main and Franklin, up stairs; Jones & Jones, Main and Washington, up stairs ; Gillett & Gillett, Main and Franklin, up stairs; M. L. DeMotte, n Washington, up stairs; T. J. M. LEPELL, DEALER IN COFFINS, WOOD and METALLIC CASES, 11 W. Mechanic St., Valparaiso, Ind.

By the rulings of All-wise Providence we are born to die, and as we know not the day or hour when the Death Angel may call upon us, it is well that we should be prepared in earthly as well as spiritual matters. Should this sad affliction befall you or yours, I desire to call your attention to my extensive stock of COFFINS, CASKETS, (both Wood and Metallic), and SHROUDS, of all sizes and patterns, from the cheapest to the most expensive manufactured. I have also, at great expense, purchased one of the finest Hearses now in use in Northern Indiana, and such other paraphernalia as is required for first-class undertaking. These facts, together with my manager's extensive experience in the business, warrants me in saying that we shall always guarantee satisfaction to the friends and family of the deceased, if favored with their order. Partial and Arterial Embalming.

Reference—the Clergy of the city and county, and my patrons.

Northern Indiana Normal School.

HOW ALL MAY BE ACCOMMODATED

— WITH —

JUST SUCH CLASSES AS THEY MAY DESIRE.

There are *Beginning, Advanced, Review, and Regular Classes* at the Normal each term. The *regular* classes are designed for those who can remain in the school during the three years required for the completion of the course. It is not necessary that they remain three consecutive years, as the classes are so arranged that the student may drop out and teach a term, then return and take up his studies just where he left off, without any inconvenience whatever.

It is a well-known fact, however, that a very few, comparatively, ever take a *regular* course at any of the higher institutions of learning. There are thousands of young people who have but a short time to remain in school, and desire to *REVIEW THEIR STUDIES*, or study certain branches in order to prepare themselves for a certain work. To accommodate this most numerous class, we have established *Beginning, Advanced, and Review* classes, which are organized every term in each of the branches. The classes are so arranged that:

STUDENTS CAN ENTER AT ANY TIME,

and find classes suited to their wants. This makes it a very convenient school for **TEACHERS**. No matter when their schools *may close*, they can come to the Normal and **BE ACCOMMODATED**. All who enter the school have the privilege of

SELECT THEIR OWN STUDIES AND ADVANCE AS RAPIDLY AS THEY MAY DESIRE.

No one need fear that he will not be accommodated at any time.

ARE NOT CLASSES NECESSARILY LARGE?

This is a question which frequently comes to us. We reply that we have an *abundance of room*. The teaching force is increased in proportion to the number in attendance. With the exception of the Grammar classes,

NO CLASS EXCEEDS SIXTY IN NUMBER,

which is considered by a majority of educators the proper number for one teacher. Many of the classes, however, have a much smaller number than this. The Grammar classes are so conducted that the larger they are, the better the work accomplished.

"BACKWARD OR TIMID STUDENTS."

Many suppose that "Backward Students" will not have equal opportunities with those who are more "Forward," or have more "Confidence" in themselves. At the Normal this difficulty is carefully guarded. Those who are "Timid" receive the most careful attention. They are called upon to recite often, and by this means usually become first in their classes.

The School has stood the test of criticism, and now the only objection urged against it is that "The attendance is so large that each student cannot receive proper attention." This comes from those unacquainted with the management of the School. It is true that were the same number of teachers employed; the same help to care for students retained; the same amount of room used, when the attendance is large as when it is small, then the objection would be valid. But where the teaching force is increased in proportion to the number of students in attendance; reliable help procured for each department; and an abundance of room supplied, it is plain to be seen that a School of one thousand students can be as easily managed as one of five hundred, with as good results, and we believe better. Experience has proven that a large attendance, instead of being detrimental to a school, affords many advantages that *cannot be enjoyed where the attendance is small*. A few of these advantages are here given:

I. It gives a means of making the expenses much less than they could possibly be made in any other way.

II. It enables the officers of the School to supply more teachers, and those better qualified. Instructors of ability are always anxious to secure positions in prosperous institutions.

III. It gives a greater range of studies, hence students can be accommodated with just such branches as they may desire.

IV. It affords facilities for securing better positions for students.

V. It places the school on a firmer financial basis, furnishes money with which to supply apparatus, books, etc. In fact, a large attendance gives strength and vigor, encouragement and cheer, and thus causes general growth and prosperity.

Besides all these, it is a sure indication that the work is satisfactory. The growth of a school is an almost certain index of what it is accomplishing. When students return term after term, and in almost every case bring some of their friends with them, it proves conclusively that satisfaction is being given.

LOCATION.

Valparaiso, containing about 5,000 inhabitants, is easily reached from all points, being located on the Pittsburgh, Ft. Wayne and Chicago, Chicago and Grand Trunk, and New York, Chicago, & St. Louis Railroads, 44 miles east of Chicago. Going Westward, the Pittsburgh, Fort Wayne and Chicago Railroad makes connection at Chicago with all lines leading into the city; going Eastward, at Plymouth with the Indianapolis, Peru and Chicago Railroad, which makes connection with all roads leading into Indianapolis; further Eastward the Pittsburgh, Fort Wayne and Chicago Railroad makes connection with all North and South lines. The Chicago and Grand Trunk Railroad, going Westward, makes connection at Chicago with all lines leading into the city; going Eastward, with the Louisville & New Albany Railroad at Haskell, with the Baltimore & Ohio Railroad at Wellborough, with the Lake Shore and Michigan Southern at South Bend, and with all North and South lines in Michigan. Going westward, the New York, Chicago and St. Louis Railroad, makes connection at Chicago with all lines leading into the city, going eastward with all North and South lines. The Louisville and New Albany Railroad, running the entire length of the State from North to South, makes connection at Haskell with the Chicago and Grand Trunk Railroad. The Louisville and New Albany road has recently been refitted and refurbished, and runs through trains, thus enabling students from the Southern part of the State, and from the Southern States to come through with but one change. The city is situated in as beautiful and fertile tract of country as can be found in the West, and for healthfulness is unsurpassed. These facts, together with the intelligence and Christian character of its inhabitants, make it one of the most desirable places for a Literary Institution anywhere to be found.

The School Building is a large and commodious one, situated on an eminence overlooking the city and surrounding country. The Campus, containing five acres, is beautifully ornamented with a natural grove, affording a grateful shade in summer, and shelter from the storms of winter.

Mixed drinks of the most modern decoction furnished in season.

GIVE US A CALL. WE ASSURE SATISFACTION.

PERPETUAL CALENDAR CARD.

This Calendar Card is based upon the following

RULE.

To Calculate the Week-day for Any Date.

Consider the number of desired year as in two sections, separated at left of tens place; divide each section by 4; multiply by 5 the remainder at the left and to this product add both dividend and quotient at the right (disregarding remainder) also the number of the day of year (less one if a leap year; divide this sum by 7 and remainder will indicate number of the day of week sought.

EXAMPLE.—January 1, 1886 was Friday.

$\frac{18}{4} = 4$ 18'86 = year number

$\frac{21}{4} = 5$ 21 = quotient

remainder $2 \times 5 = 10$

$10 + 5 = 15$ = day of year

$15 \div 7 = 2$ 118

16 and remainder 6, indicating Friday, the 6th day of the week.

THE PERPETUAL DIAL CALENDAR

Based upon the same mathematical principles, is the most convenient a novel calendar in existence.

Copyright, 1896, Chas. R. Talbot. All rights reserved.

SEVEN HERE (or use 2 cards) observe *italics* for leap-years a slide desired month a year to *above column*. The week-day index will then be correctly set if the desired date is in the present century.

For a date not in the present century, proceed as above then slide to 1st of month the week-day found (by arithmetical progression) in column with number representing hundreds in desired year.

To ascertain day of year, (Observe *italics* on leap years) add to day of mo. the number with *above* of mo.
